ABOUT ERGONPIN

Would you like to play a double bass that feels as light as a cello?

If so, then it is time for you to try the Ergonpin, the double endpin with two adjustable rods.

VERSATILE The Ergonpin can be used as a traditional endpin, as an angled endpin or with both rods simultaneously, be it in a standing or sitting position.

COMFORTABLE Unlike other angled pins on the market, the Ergonpin allows the musician to set the chair as low as possible with both feet on the floor.

ERGONOMIC The Ergonpin is designed to be the most ergonomic solution for the most diverse positions.

THE STORY

THE INVENTOR SAULO GENERINO BEZERRA DE MELO

My passion for double bass began at an early age as I used to watch my father, Gabriel Bezerra de Melo, then musician of the Brazilian Symphony Orchestra, play the instrument. In 1980, at the age of 22, I joined the Brazilian Symphony Orchestra (OSB) and later the Petrobrás Symphony Orchestra (OPES). During these 40 years, I was also a member of the National Symphony Orchestra of the Rio de Janeiro State Federal University (OSN) and the Symphony Orchestra of the Federal University of Rio de Janeiro (OSUFRJ). Currently, I am the concertino at the Brazilian Symphony Orchestra and the Petrobrás Symphony Orchestra.

THE INVENTION THE ERGONPIN

After so many years in this profession, the weight of the instrument started to take its toll. But looking for angled endpins on the market, I found no truly ergonomic solutions. That's why I developed the Ergonpin, a double bass double endpin that is perfectly adaptable to each musician's playing position, even sitting with both feet on the floor. The Ergonpin means to me the ability to perform my art in a healthier way. I am glad to see the Ergonpin serving many musicians and help them achieve their best sound.
